HOT WATER MADE EZ UTILITY AND PROCESS WATER HEATING

From cooking baby food to pasteurization to sanitary wash-down, Direct Steam Injection (DSI) is the right choice to optimize your water heating process. This 100% energy efficient method provides the most economical and hassle-free choice for all your hot water needs.

GENERAL INDUSTRIES WE SERVE

- ◆ Food Manufacturers
- ◆ Dairy Manufacturing
- ◆ Beverage Manufacturers
- ◆ Power Plants
- ◆ Pharmaceutical Companies
- ◆ Industrial Laundry
- ◆ Chemical Plants
- ◆ Cement Companies
- ◆ Meat and Poultry Processing

APPLICATIONS

- **Hose Stations**
Replace multiple steam/water mixing tee stations with one EZ Heater to eliminate maintenance and down-time headaches due to scaling and fouling.
- **Sanitizing Stations**
Instantaneous hot water while maintaining accurate water temperatures. Applications ranging from CIP, COP, wash down and proper sanitizing of processing stations and equipment.
- **Jacketed Kettles and Cooking Pots**
Greatly reduce cycle time by preheating potable water. Maintain batch consistency by providing instantaneous hot water at exact temperatures.
- **Supplemental Hot Water Heating**
Instant and unlimited hot water on-demand. Accurate temperature control and patented self-cleaning design makes the EZ Heater the ideal solution to provide additional hot water at various flow rates, when and where you need it.

HYDRO-THERMAL SOLUTION

- ◆ Exceptional energy savings over heat exchangers
- ◆ Patented self-cleaning design to handle even hard water
- ◆ Precise temperature control +/- 1°F
- ◆ Exceptional turn-down ration to handle various flow rates
- ◆ Instantaneous hot water on demand from 2-600 gpm
- ◆ Internal modulation for quiet, hammer-free operation
- ◆ Heavy duty 316 stainless construction
